Introduction

In today's global community, competence in more than one language is an essential part of communication and cultural understanding. Study of another language not only provides individuals with the ability to express thoughts and ideas for their own purposes but also provides them access to perspectives and knowledge that are available only through the language and culture. Advanced language learning offers social, cultural, academic and workplace benefits that will serve students throughout their lives. The proficiencies acquired through the study of languages and literatures endow language learners with cognitive, analytical and communication skills that carry over into many other areas of their academic studies.

The three modes of communication (Interpersonal, Interpretive and Presentational) defined in the *Standards for Foreign Language Learning in the 21st Century* are foundational to the AP® German Language and Culture course. Course work provides students with opportunities to demonstrate their proficiency in each of the three modes in the Intermediate to Pre-Advanced range as described in the *ACTFL Performance Guidelines for K–12 Learners*.

The AP German Language and Culture course takes a holistic approach to language proficiency and recognizes the complex interrelatedness of comprehension and comprehensibility, vocabulary usage, language control, communication strategies and cultural awareness. Students should learn language structures in context and use them to convey meaning. In standards-based world language classrooms, the instructional focus is on function and not the examination of irregularity and complex grammatical paradigms about the target language. Language structures should be addressed inasmuch as they serve the communicative task and not as an end goal. The AP German Language and Culture course strives to promote both fluency and accuracy in language use and not to overemphasize grammatical accuracy at the expense of communication. In order to best facilitate the study of language and culture, the course is taught in the target language.

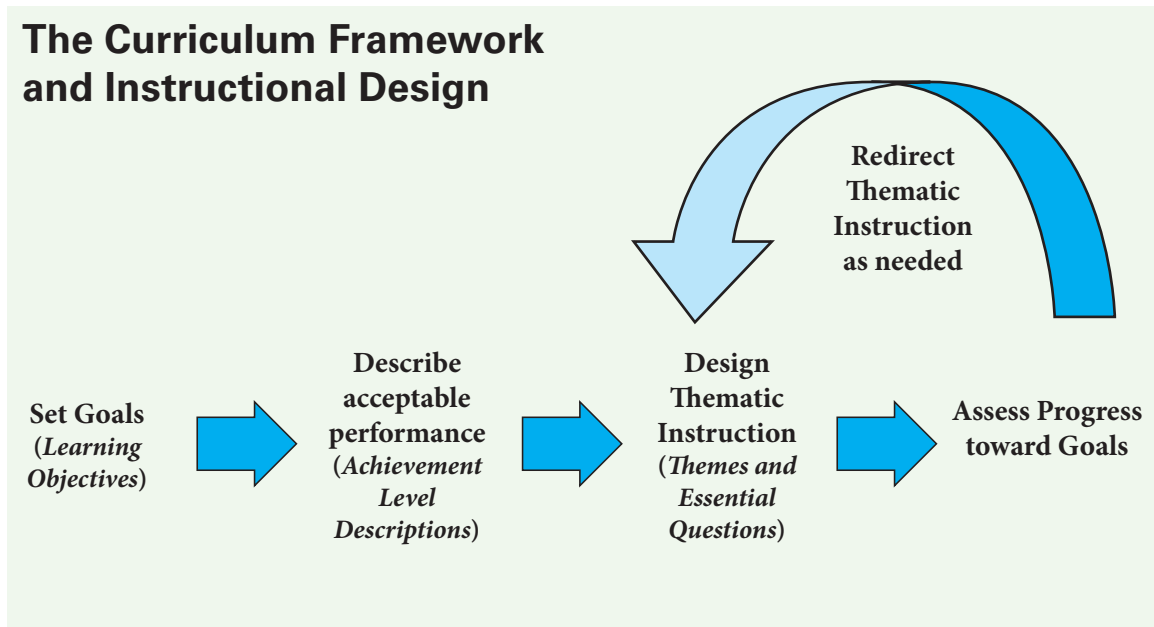

The AP German Language and Culture course engages students in an exploration of culture in both contemporary and historical contexts. The course develops students' awareness and appreciation of cultural products, both tangible (e.g., tools, books, music) and intangible (e.g., laws, conventions, institutions); practices (patterns of social interactions within a culture); and perspectives (values, attitudes and assumptions that underlie both practices and products).

Structure of the Curriculum Framework

This curriculum framework begins by outlining the *learning objectives* and the *achievement level descriptions* that define student performance across five levels.

Tools for instructional design come next: *themes* to integrate language, content and culture into an interrelated series of lessons and activities; *recommended contexts* for exploring each theme; and *overarching essential questions* to engage learners and guide classroom investigations, learning activities and performance assessments.

The following graphic illustrates how the components of the curriculum framework relate to instructional design:

Learning Objectives and Achievement Level Descriptions

At the core of the AP German Language and Culture course are six groups of *learning objectives* identifying what students should know and be able to do across the three modes of communication. These objectives outline expectations of student abilities in the following areas:

- Spoken Interpersonal Communication
- Written Interpersonal Communication
- Audio, Visual and Audiovisual Interpretive Communication
- Written and Print Interpretive Communication
- Spoken Presentational Communication
- Written Presentational Communication

The degree to which student performance meets the learning objectives in each area is articulated in the *achievement level descriptions*, which clearly define how well students at each level perform.

Overarching Premise

When communicating, students in the AP German Language and Culture course demonstrate an understanding of the culture(s), incorporate interdisciplinary topics (Connections), make comparisons between the native language and the target language and between cultures (Comparisons), and use the target language in real-life settings (Communities).

Interpersonal Communication

The Interpersonal Mode is characterized by active negotiation of meaning among individuals. Participants observe and monitor one another to see how their meanings and intentions are being communicated. Adjustments and clarifications can be made accordingly.

Learning Objectives for Spoken Interpersonal Communication

Instructional Design Using Themes

Designing the AP German Language and Culture course around themes promotes the inclusion of a variety of language concepts into a context that is interesting, meaningful and worth exploring. Themes provide an integrated approach to teaching and learning, bring content to the language lesson and connect the modes of communication in meaningful ways. They help teachers integrate language, content and culture into an interrelated series of lessons and activities that promote the use of the language in a variety of contexts. A theme may be used to plan a brief unit of study, a comprehensive unit spanning a greater period of time or to connect with AP courses in other disciplines.

The AP German Language and Culture course is structured around six themes:

Recommended Contexts and Essential Questions

Each theme includes a number of *recommended contexts* for exploration. Teachers are encouraged to engage students in the various themes by considering historical, contemporary and future perspectives as appropriate. Teachers should assume flexibility in resource selection and instructional exploration of the six themes. The recommended contexts are not intended as prescriptive or required, but rather, they serve as suggestions for addressing the themes.

One way to design instruction with the themes is to identify *overarching essential questions* to motivate learners and to guide classroom investigations, learning activities and performance assessments. Essential questions are designed to spark curiosity and engage students in real life problem solving tasks. They allow students to investigate and express different views on real world issues, make connections to other disciplines and compare aspects of the target culture(s) to their own. Essential questions also lend themselves well to interdisciplinary inquiry, asking students to apply skills and perspectives across content areas while working with content from language, literature and cultures of the German-speaking world.

Integrating Themes, Recommended Contexts and Essential Questions

AP German teachers are encouraged to consider the interconnectedness of the themes. A unit on environmental issues (Global Challenges) might, for example, touch upon recommended contexts from more than one theme. Students might study inventions as catalysts of change over time (Science and Technology), influences from religious beliefs or social values (Personal and Public Identities), or the aesthetics of eco-friendly architecture (Beauty and Aesthetics).

The recommended contexts for exploring a theme can be varied depending on available authentic materials, teacher-developed resources and commercially produced materials, as well as teacher creativity and student interest. The design of the course should include essential questions that will capture students' interest, engaging authentic materials and learning activities that help students consider themes across time and across cultures.

It should be noted that literature is not merely a recommended context for one of the course themes (Beauty and Aesthetics), but should serve as a powerful vehicle for delivering content to address all of the themes. Literary works may be incorporated throughout the AP German Language and Culture course, and in relation to a variety of themes, such as environmental issues (Global Challenges), family structure (Families and Communities), or issues of alienation and integration (Personal and Public Identities).
